

Karey Maynor

 [karey-maynor.github.io](https://github.com/karey-maynor)  0009-0009-3351-8408

Research Interests

- Thermal/Energy Systems
- Thermal/Fluid Science
- Thermal Management
- Liquid/Gas Separation
- Ionic Liquids & Metal Organic Frameworks
- Hydrates
- Carbon Capture, Utilization, & Storage (CCUS)
- Desalination
- Low-carbon Energy Solutions
- Hydrogen
- Waste Valorization
- Circular Economy

Education

The University of Texas at Austin

August 2026

Ph.D. in Mechanical Engineering

- Dissertation Title: *Techno-economic enhancement of hydrate-based technologies and direct air capture*
- Cumulative GPA: 4.00

Texas A&M University – College Station

May 2017

B.S. in Chemical Engineering

- Safety Engineering Certificate, Minors in Business and Chemistry
- Cumulative GPA: 3.34

Research Experience

Water-Energy Research Laboratory (WERL), Georgia Institute of Technology

Month 2026 - present

Postdoctoral Fellow

Bahadur Research Group, The University of Texas at Austin

Mar. 2022 - present

PI: Dr. Vaibhav Bahadur

National Science Foundation Graduate Research Fellow

2023 awardee

- Conducted CO₂ hydrate formation experiments using gas mixtures of CO₂ and N₂ to evaluate magnesium kinetic promoter and to study the impact of lower concentrated CO₂ streams on hydrate formation rates in a bubble column reactor.
- Modeling techno-economics of a hydrates-based desalination facility from mixed gas sources to understand the economic implications and to compare against pure CO₂ sequestration costs and leading desalination techniques.
- Developing a life cycle analysis study for CO₂ separation and sequestration via hydrates for storage on the seabed floor.
- Designed and fabricated thermal testbeds and developed CFD simulations (ANSYS) to quantify heat transfer enhancements in heat pipes and interposers for next-generation integrated electronic packages as part of two Texas Institute of Electronics (TIE) projects.
- Collaborating with researchers from Instituto Superior Técnico, University of Lisbon to develop novel magnesium based ionic liquids for CCUS and gas separation applications.
- Developing first principles, system-level, and techno-economic models of a novel mass exchanger for use in direct air capture installations.
- Studied the economic and emissions impact of electrified hydrogen production on the final costs of ethanol in the Midwest utilizing Aspen Plus, H2A-Lite, and GREET models.

Graduate Research Assistant

Mar. 2022 – Sept. 2023

- Designed and executed THF hydrate formation studies to further understand the mechanisms of magnesium-based nucleation promotion.

- Developed a process model in Aspen Plus and a techno-economic model in MATLAB to analyze the economic and emissions benefits of clean hydrogen-based ammonia production.
- ARPA-E sponsored project to develop novel insulating materials to extend the life of power transformers. Experimental data was used to refine and verify ANSYS thermal model of the transformer. Characterized thermal degradation threshold for insulating materials via viscosity and tensile strength measurements.

Systems Optimization & Multi-Scale Analysis Lab, Texas A&M University

Summer 2016

Undergraduate Research Assistant

- Investigated water extraction and purification technologies from effluent streams to develop a process superstructure and MINLP model.

Honors & Awards

National Science Foundation Graduate Research Fellowship	2023 awardee
Leigh Family Endowed Graduate Fellowship in Mechanical Engineering	Aug. 2025
Professional Development Award, Graduate School	Nov. 2023 & Aug. 2025
Chevron Energy Graduate Fellow Award	Sept. 2023
Cockrell School of Engineering Thrust 2000 Fellowship	Aug. 2021 – 2025
T.W. Whaley, Jr. Friends of Alec Endowed Scholarship	Aug. 2021 – May 2022

Maynor, K.; Hamalian, M.; Bahadur, V. Carbon Dioxide Hydrate Formation-Based Carbon Capture from Mixtures of Carbon Dioxide and Nitrogen [Oral]. ASME 19th International Conference on Energy Sustainability, Westminster, CO, **2025**.

Maynor, K.; Childers, G.; Soori, T.; Lin, N.; Lewis, M.; Bahadur, V. System-Level and Techno-Economic Analysis of Ammonia Production from Clean Hydrogen in the Permian Basin in Texas.

- 2025, Jul. [Oral]. ASME 19th International Conference on Energy Sustainability, Westminster, CO.
- 2024, Oct. [Poster]. UT Austin Energy Institute Hydrogen Workforce Summit & Hydrogen Day 2024, Austin, TX. (awarded 5th place in poster competition out of 41)
- 2024, Jun. [Oral]. Chevron Energy Fellows Virtual Forum.
- 2024, Apr. [Poster]. UT Austin Center for Electromechanics H2@Scale in Texas Ribbon Cutting Ceremony 2024, Austin, TX.
- 2025, Mar. [Oral and Poster]. UT Austin Energy Institute UT Energy Week 2024, Austin, TX.
- 2023, Nov. [Oral]. ASME 2023 International Mechanical Engineering Congress and Exposition, New Orleans, LA.

Professional Experience

Heat Transfer Research, Inc.

Jun. 2017 – Jun. 2021

Test Engineer I & II

- Conducted research experiments on closed loop pilot scale systems to study heat transfer and fluid dynamic phenomena.
- Designed and directed construction of a \$107k unit upgrade and delivered the project 33% under budget and 2 months ahead of schedule.

- Performed data analysis and rigorous engineering calculations for both theory-based and design validation experiments.

Technical Lead – ISO 17025 QMS

- Led the company through 2 reaccreditation audits, maintaining compliance in the interim.
- Managed technical personnel during certified testing contracts.

Lead – Safety Program

- Spearheaded a team of top management & research technicians to overhaul safety practice.
- Standardized HTRI's HAZOP study process & lead the team.

Teaching

The University of Texas at Austin

Aug. 2022 – Apr. 2023

Graduate Teaching Assistant

- Led 2 sections per semester of ME139L Experimental Heat Transfer Lab. Taught experimental design concepts, uncertainty analysis, and systems analysis related to heat transfer systems.

Certifications

- Center for Teaching and Learning Teaching Preparation Series Advanced Certification
- Cockrell School of Engineering Teaching Assistant Certification

Leadership & Community Involvement

Mentorship & Supervision, The University of Texas at Austin

Aug. 2022 – Aug. 2026

- Responsible for mentoring and advising newly admitted students in Dr. Bahadur's research group. Mentored 2 PhD, 1 masters, and 2 undergraduate students.

Graduate Engineering Council, The University of Texas at Austin

Aug. 2021 – May 2024

President

- Led the highest attended career and research networking event for the graduate engineering community with over 60 poster presenters and 14 industry sponsors – Graduate and Industry Networking Event (GAIN).
- Awarded a record amount of over \$10,000 for research and travel grants to graduate engineering students.
- Fulfilled GEC's mission of improving the lives of engineering graduate students by increasing the number of social events and seminars, launching a series of seminars to navigate common graduate school challenges, and fundraising a record amount to support these events and GAIN.
- Served on the Senate of College Councils President committee, a student government body.

Financial Director

- Supported GEC financial obligations and goals by preparing and maintaining a detailed budget and fundraising for the organization to support student outreach activities, mental health seminars, research seminars, and the graduate and industry networking event (GAIN).
- Served on the Senate of College Councils Financial Director committee appropriating funds to support university wide student outreach events.

Information Technology & Webpage Director

- Managed the webpage, social media accounts, and all IT related responsibilities for the organization. Redesigned the website for improved user experience.

Technical Skills

Programming Languages: Python, MATLAB, LabVIEW

Simulation/Modeling: AspenPlus, ANSYS (Discovery, Fluent)

Professional Service & Memberships

Conferences

- Chaired technical sessions at ASME Summer Heat Transfer Conference

Reviewing Activities

- Separation and Purification Technology Journal
- ASME Summer Heat Transfer Conference
- ASME Energy Sustainability Conference

Memberships

- American Society of Mechanical Engineers (ASME)
- American Institute of Chemical Engineers (AIChE)
- American Society of Thermal and Fluids Engineers (ASTFE)
- International Research Association on Circular Economy (IRACE)
